PROFILE

My interest and passion for web development began at an early age.

While I also enjoy back-end development, I gravitate toward the front-end. I love modern UI & responsive design, graphic manipulation, unique user experiences, and best practice/clean code. Give me an idea or .PSD and let me bring the design to life!

EDUCATION

General Assembly - Austin, TX Full-Stack Web Dev Immersive

A 12-week, 60-70 hrs/week coding bootcamp designed to teach students full-stack web technologies including HTML, CSS, JavaScript, Ruby on Rails, SQL, the MEAN stack, React.JS and others in a collaborative environment while applying best industry standards.
